## Test from here HTTP/3

<https://geekflare.com/tools/http3-test>

 HTTP/3 Test

<https://www.ddoshostingprotection.com/>

IP Address

45.58.138.125

Test Time

Thu, Jan 19, 2023 1:24 PM (GMT -05:00)

Share Report

### Results

Great! HTTP/3 is enabled. It supports the following protocol version.

h3-29

h3-Q050

h3-Q046

h3-Q043

quic/43

quic/46

## 2- Virtualization AI Cloud (ALL IN ONE)

=====

- Isolation Cloud Hosting
- Own CPU, Memory, Storage, Process per Second, Concurrent Connections.
- Multiple PHP Version (4.0, 5.2, 5.3, 5.4, 5.5, 5.6, 7.0, 7.1, 7.2, 7.4, 8.0, 8.1, 8.2)
- Multiple Python APP Version (2.7, 3.3, 3.4, 3.5, 3.6)
- Multiple Ruby APP Version (1.8, 1.9, 2.0, 2.1, 2.2, 2.3, 2.4, 2.5)
- Multiple NodeJS Version (6.13.1, 8.10.0, 9.9.0)
- Mysql, PostgreSQL Management Governor.

## 3- High Performance (Software and Hardware)

=====

- **LiteSpeed 6.0 Enterprise 4CPUs**
- Load Balancing HTTP/2 Litespeed Webserver
- Performance **90X** more faster that Apache Webserver.
- More Processing Speed, With 3000MBsn Super Faster SSD .
- Redundant Matrix RAID 10 SSD

## 4- Faster Propagation in the world

=====

- DNS Anycast DDoS Protection Globally

## 5- Security (Anti-Malware and Anti-Intrusion)

=====

- Maximum Security With Sophisticated Attack Detection And Protection

## **Six Layer of Security**

=====

- Advance Internal Firewall
- IDS / IPS
- Malware Detection
- Sandboxing
- Patch Management (Hardened PHP Automatic)
- Reputation Management

## **WAF:**

- Immunify360

## **6- DDoS Protection (Anti-DDoS)**

=====

- Advance WAF Security Layer 7 / More DDoS Protection for All Plans
- Minimum Plan Medium Risk From 60GBPS DDoS Protection
- Maximum Plan High Risk 2.9TBPS DDos Protection Globally.

## **7- BACKUPS (Contingency)**

=====

- two weekly backups Cpanel Account client.
- two weekly backups O.S platform.

## **8- KERNEL SECURITY**

=====

- Automated Kernel Security Updates Without Reboots
